6. Maximum Insurance Indemnity Amount

The maximum insurance indemnity amount is including the Insured's legal defense and survey costs (incl. VAT).

The maximum indemnity amount is mentioned in the Policy Letter. The amount represents the total compensation for the entire period of insurance.

7. Deductible

The deductible amount is mentioned in the Policy Letter. Each defect is to be considered as a separate claim.

8. Insurance Compensation

8.1. Amount of Compensation

The insurance policy is not intended to provide the **Insured** or the **Purchaser** with any profit, only replace the loss suffered, even if the sum insured is higher. Regulating the claim is done primarily through cash settlement.

If the **Purchaser** makes a claim against the **Insured**, the **Insurer** will, provided that the claim exceeds the deductible:

- Investigate if the **Insured** is liable to compensate the **Purchaser** according to the Housing Transaction Act.
- Negotiate with the claimant.
- Defend the **Insured** in a trial or in other available mechanisms of dispute resolution, thereby paying the litigation costs that the **Insured** suffered or is ordered to pay and which cannot be recovered from the counterparty or another liable party. Any lawyer appointed as **Insured's** counsel must be pre-approved by the **Insurer**.
- Pay the indemnity provided that;
 - the **Sales Contract** is not cancelled,
 - the **Insured** is liable to compensate,
 - the amount exceeds the deductible and that the claim is covered by the insurance.

Continues

Indemnification will never be paid in order to increase building standard, except when the increase in the building standard is due to legal norms requiring higher standard than the original building standard. The indemnification for the loss shall never be higher than the cost to repair the damage added with other associated costs such as legal and survey costs.

Notwithstanding the above, the compensation is never higher than stated in paragraph 6 “Maximum Insurance Indemnity Amount” above.

8.2. Age reduction

A compensation will be what the **Object** was worth just before the loss. When a damaged part of the **Object**, for example, a floor is replaced by a new, similar one put in the same place and intended for the same use, we say that compensation is based on the replacement value of the **Object** in question.

The value of an **Object**, however, may have reduced to less than 50 % of an equivalent new one owing to, for example, age, use and suitability for its intended purpose. If this is the case, we will compensate according to its current value.

An age reduction is made when a part of the **Object** has a damage. An age reduction is made, for example, on the costs of pulling down, repairing and drying the structures of a damaged **Object**.

The maximum age reduction is however 50 % for everything excluding bathroom(s).

Part of the Object	Age	Age reduction of the loss amount
1) Any part, except 3) below	0-10	0 % per year
2) Any part, except 3) below	10 <	3 % per year
3) Bathroom (or similar)	Any	3 % per year

The age of the part(s)/property is calculated as the number of full calendar years following the year the part/parts was installed.

Replacement value – Age reduction = Compensation to the **Insured**

Age reduction in case of machine, equipment or pipe breakage in an Object	Age reduction
Tanks, waste water, rainwater, supply water and heating pipes of the building, other than those located in the ground slab;	3 %
Copper and plastic pipes in the ground slab and underground;	3 %
Other pipes in the ground slab and underground;	6 %

The age reduction percentage is computed by multiplying the percentage in the above table by the number of full calendar years following the year the property was first used.

Age reductions are also made on costs of;	Age reductions are not made on;
<ul style="list-style-type: none"> • Exposing and resealing structures of a building • Excavating and filling 	<ul style="list-style-type: none"> • Costs arising from locating faults and damage, • Electric cables
